### **Speedline Electrovert Receives Multiple Awards at NEPCON Shanghai 2011**

CAMDENTON, MISSOURI – May 27, 2011 – During ceremonies at the NEPCON China trade event in Shanghai on May 12, Speedline Technologies' Electrovert equipment was honored with several prestigious awards. The EM Asia Innovation award was presented to Speedline as the top performing company in the reflow soldering category. Two SMT China VISION awards were also presented to Speedline in the PCB cleaning and reflow soldering categories. Winners were honored for their innovation, R&D efforts, and the value and productivity achieved by the end-user.

As environmental impact continues to be an ever-increasing issue at all levels of the supply chain, Speedline Electrovert stepped up to the challenge of developing the OmniES reflow soldering system. The OmniES (Eco-friendly System) is an advanced reflow soldering system that fulfills three important requirements of the reflow market: 1) require less electrical power to operate; 2) lower operating costs; and 3) meet the performance requirements for lead-free reflow soldering in demanding production environments.

To overcome the latest challenges of PCB designs, such as highly dense layouts, and complex and miniaturized components, Speedline Electrovert designed the Aquastorm 200SSSt. This stainless steel cleaning system provides high-level cleaning performance, process flexibility, fast throughput, and process monitoring.

According to Greg Calvo, Electrovert product manager, "With creative engineered solutions that are designed into all Electrovert product lines, wave, reflow, and cleaning, we are able to offer our customers the most advanced technologies that deliver cost savings and highest first pass yields."

## PHOTO CAPTIONS

Photo 1: Electrovert Asia Product Mgr, Ching How Ng, accepts the EM Asia Innovation award for “Best in Reflow” category.

Photo 2: Electrovert Asia Product Mgr, Ching How Ng, accepts the SMT China VISION awards for “Best in Reflow” and “Best in Cleaning” categories.

### About Speedline Technologies

Speedline Technologies is the global leader in process knowledge, services and manufacture of capital equipment used in printed circuit board assembly and semiconductor industries. Based in Franklin, Massachusetts, USA, the company markets five best-in-class brands: Accel microelectronics cleaning equipment; Camalot dispensing systems; Electrovert wave soldering, reflow soldering and cleaning equipment; MPM stencil and screen printing systems; and Protect global services, support and training solutions.
